

A modern healthcare waiting area featuring a large, light-colored wooden shelving unit with multiple open shelves and closed cabinets. The shelves are decorated with various plants, books, and small objects. In the foreground, three contemporary armchairs with light-colored upholstery and metal frames are arranged around a low, square wooden coffee table. The floor is covered with a light-colored, textured rug. The background wall is white, and a large window with vertical wooden slats is visible on the left side.

WHO ARE WE?

Hill Cross Furniture was established in 2000 and is a family-run business based on a working farm in North Yorkshire.

We were founded to fulfil the growing demand to supply and manufacture high-quality, made-to-measure contract furniture for the hospitality and healthcare markets.

Now, 24 years later, we work globally with clients and pride ourselves on our ability to provide a five-star project-managed service. This allows our clients complete transparency to deliver their projects on time, on budget, and true to their design.

Our 40 strong team includes people with the skills to look after every aspect of your project, from start to finish. A dedicated project team is assigned to each client on commission.

BESPOKE BANQUETTE SEATING

The manufacture and upholstery of bespoke fixed/banquette seating all takes place at our farm base. Watch our video below to see what goes into the production of our banquette seating.

We provide a complete end-to-end service ourselves from CAD design to install by our own delivery and fitting team. Talk to us about how we can produce fixed seating to your exact requirements.

our emissions

PlanetMark

ABOUT PLANET MARK

We are proud partners of Planet Mark, a sustainability certification helping organisations measure and reduce their carbon emissions.

Planet Mark is a sustainability certification which recognises continuous improvements, encourages action, and builds an empowered community of like-minded individuals.

Holders of the Planet Mark are required to measure and reduce their annual carbon emissions associated with business operations by a minimum of 2.5% every year. This process helps them understand and optimise the carbon associated with their energy, travel, water, waste, and procurement.

Each year the new carbon footprint becomes the next year's baseline, thus driving continuous improvement and helping generate outstanding results.
