

HILL CROSS FURNITURE OVERVIEW

WHO ARE WE?

Hill Cross Furniture was established in 2000 and is a family-run business based on a working farm in North Yorkshire.

We were founded to fulfil the growing demand to supply and manufacture high-quality, made-to-measure contract furniture for the hospitality and healthcare markets.

Now, 24 years later, we work globally with clients and pride ourselves on our ability to provide a five-star project-managed service. This allows our clients complete transparency to deliver their projects on time, on budget, and true to their design.

Over recent years, the demand for the workplace to offer more than just a desk and task chair has seen a significant shift within office design. With breakout spaces, meeting areas and canteens all seeing a rise in popularity Hill Cross Furniture has been involved in some pretty exciting Workspace projects with the likes of WeWork, ETC Venues and more.

We can supply furniture for all your office needs, from the traditional desk and work chairs, to stunning lounge furniture and statement pieces to create workspaces where people actually want to spend time.

Education furniture is also seeing a change in style, with universities and colleges looking to create contemporary environments where students can relax and feel at ease.

As with workspace, we can supply all aspects of furniture for education facilities, from everyday items like desks and school chairs to more bespoke items like sofas, fixed seating and meeting pods.

ABOUT PLANET MARK

We are proud partners of Planet Mark, a sustainability certification helping organisations measure and reduce their carbon emissions.

Planet Mark is a sustainability certification which recognises continuous improvements, encourages action, and builds an empowered community of like-minded individuals.

Holders of the Planet Mark are required to measure and reduce their annual carbon emissions associated with business operations by a minimum of 2.5% every year. This process helps them understand and optimise the carbon associated with their energy, travel, water, waste, and procurement.

Each year the new carbon footprint becomes the next year's baseline, thus driving continuous improvement and helping generate outstanding results.
